

## SE-5000 Series are widely used in following industrial applications:

Bio-Safe Chest, Laminar Flow Bench, Industrial Vacuum Cleaner, Drying Oven, Respiratory Treatment Equipment, etc. in Electronic Air Circuit System as measuring gauge in monitoring differential pressure in ventilation system.

## Specifications

- Measuring Media: Gas
- Accuracy: 5%
- Maximum pressure resistance: 30 PSI
- Environment Temperature: -6 ~ 50 °C
- Casing Material: FRP & ABS
- Dimensions: diameter: 65.88 mm
- Weight: 170 g
